

relevate schedule.

making scheduling smarter

get the most out of your time

Shift-based work presents challenges for managers and team members alike. Between last-minute callouts, time off and unpredictable sick days, it's hard to be prepared for everything. Particularly when the unexpected happens, it can be hard to trade shifts or coordinate to backfill via text, phone and email. If only there was a way to manage shift-based work in one place.

There is — and it's called Relevate Schedule, part of the releviate technology suite from Randstad.

releviate schedule for managers

Relevate Schedule is a versatile, smart solution that streamlines scheduling and reporting processes. With an automated scheduling process in place and data at our fingertips, we're able to get the right people for the right jobs right away — and that means we can fill shifts faster and more strategically. In fact, at client sites where we have deployed Relevate Schedule, we've reduced the amount of time spent communicating with talent via phone by 80 percent. This enables us to provide more value, in areas like recruiting great candidates and on-site talent engagement.

releviate schedule for team members

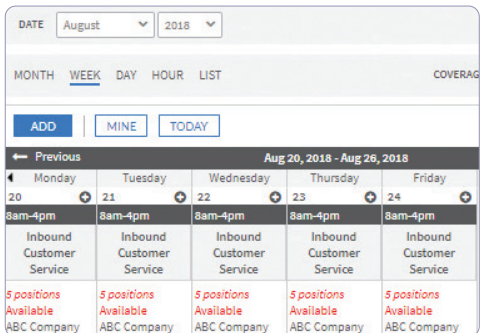

Sometimes life gets in the way of a team's shifts. When an unexpected life event happens, it can be hard to communicate and arrange coverage with other team members in a timely fashion. But with Relevate Schedule, we can manage and coordinate shift changes all in one place.

benefits

across the board.

Relevate Schedule can make life easier for everyone involved in shift-based work by delivering efficiencies and eliminating the headaches that come with scheduling and rescheduling. With Relevate Schedule, leaving voicemails for a staff member or managing schedules on paper are a thing of the past.

automate complex employee scheduling

Whatever scheduling tool you use, Relevate Schedule helps eliminate scheduling headaches and enables users to meet unique scheduling needs while easily handling unforeseen changes.

advanced rules engine

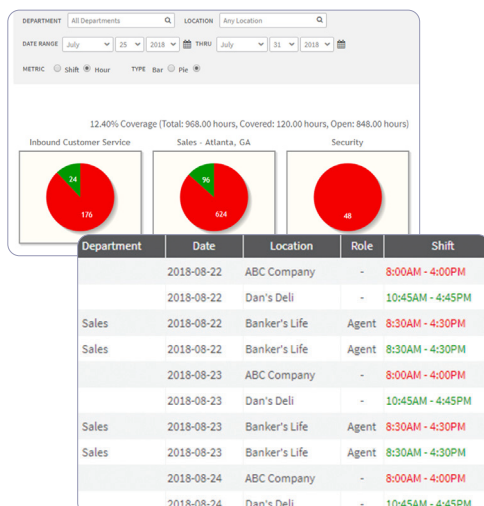

Align shifts to complex scheduling and overtime rules.

auto-fill shifts

Auto-assign shifts and manage fatigue and overtime.

automate notifications

Send schedules and shift changes automatically.

reduce labor costs

Use historical information to better predict labor needs, optimize labor coverage for every shift and track labor costs against budget.

reduce overtime

Control overtime costs and track labor costs compared to budget.

align schedule to demand

Forecast demand to create schedules.

optimize schedule

Auto-assign people to optimize labor coverage.
